

Namees Albayati

Full-Stack Web Developer

Location: Austin, TX | Mobile: (737)-288-7235 | Email: albayatinamees@gmail.com

Portfolio: <https://floating-ridge-06254.herokuapp.com/>

LinkedIn: <https://www.linkedin.com/in/namees-albayate/>

GitHub: <https://github.com/Namees-albayati>

Summary:

- **Over 3+** Years of experience as Full-Stack Web Developer with solid understanding in all the phases of the Software Development Lifecycle (SDLC), this includes Analysis, Design, Development, Testing and Maintenance of web applications for large Enterprises.
- Excellent experience in implementing MERN stack (Express JS, React.js & Node.js).
- Good experience in developing an enterprise MERN Stack applications by writing server-side code with Node.js and Express framework, MongoDB database to store and retrieve data and front-end web pages designing with React.
- Expertise in using React.js/ to build User Interface, strong knowledge of state store, middleware, action creator, reducer and container.
- Extensive knowledge on implementing UI mock-ups, integrating third party REACT libraries and handling/creating React.js store data.
- Extensively worked with Version Control Systems like GIT and GitHub.
- Experienced in Agile Methodologies and SCRUM Process.
- Experienced in using version control tools GIT to keep track of development stages and deployment stage.
- Hands on experience in using JavaScript with ES6 features to develop reusable components and using Firebase to enable predictable state change and improve maintainability of the code.
- Excellent interpersonal abilities, Communication skills, time management and team skills.
- Fine-tuned SQL queries using hints for maximum efficiency and performance.
- Extensive use of JIRA and Confluence to track user stories.
- Hands-on experience in consuming RESTful Services using JavaScript, jQuery and React.js.

Skills:

- **Programming Languages:** JavaScriptES6.
- **Web Technology:** SQL, HTML5, CSS3, AJAX, JSON, React, Node.js, Express.js, TypeScript.
- **Frameworks:** React.js, jQuery, Bootstrap.
- **Database Systems:** MySQL, Microsoft SQL Server, SQL Sequelize, Mongo DB, Graph QL, Oracle SQL 12C.
- **Software Packages:** Confluence, Jira, NPM, YARN, Microsoft (Excel, Word, PowerPoint).
- **Methodologies:** Waterfall, SDLC, SCRUM, Agile.
- **Version Control:** GIT, GitHub.
- **APIs:** RESTFUL API, REST API, Postman API.
- **Operating Systems:** Microsoft Windows, Linux, Mac OS.
- **Others:** Documentation, Presentation, CI/CD.

Education:

- **BS in Information Technology**, University of Baghdad, Iraq. **2015**
- **Full-Stack Web Development Coding Bootcamp**, University of Washington.

Experience:

Client: BCBS, TX.

Aug 2022-Current

Role: Full-Stack Web Developer.

Responsibilities:

- Involved in SDLC requirements gathering, analysis, design & testing of application developed using AGILE Methodology.
- Worked on RESTful Web Service interface using Bootstrap to the underlying API.
- Managed in developing of the presentation layer GUI for the application using HTML5, CSS3, and JavaScript.
- Applied MVC Architecture using Framework like jQuery, React.js & Bootstrap customized user interfaces. Used and Spring Aspect Oriented programming concepts for logging, security & error mechanism.
- Implemented AJAX based UI with above said Architecture with Rich Internet UI in modules.
- Worked for making web accessibility and maintaining on the company project with React.js, jQuery & Bootstrap.

- Proficient in using version control tool GitHub, committed code changes with ease.
- Manage in creating style guides and setting UI standards for enterprise/consumer applications using React.js.
- Used Bootstrap Grid System and CSS3 Media Queries to develop single responsive application with good user experience in all platforms like desktops, tablets and mobile phones.
- Management in Confluence to provide necessary online documentation to enhance the communication of the team and link the JIRA issues with online documentation.
- Managing architecture in modern web architecture using various advanced JavaScript frameworks and libraries like Node.js, React.js, jQuery, Bootstrap & Express.js. Uploaded statistics to MySQL for analysis and logging.
- Better understanding requirements and breaking them into user stories and creating user stories in JIRA.
- Used React JS in development of the web application to bind the data/model that is being retrieved from a database through services provided in a controller to the view using Scope.
- Created multiple databases with sharded collections and choosing shard key based on the requirements.
- Experience in managing MS SQL Server & MySQL environment from availability, performance & scalability perspectives.
- Used Express.JS to run on server with mock JSON data and completed the UI development independent of server.
- Used Node.JS to structure JavaScript code to build Restful webservice.
- Developed numbers of Typescripts objects including Components, ng Modules, Providers, Services, Interfaces and classes utilizing arrow function and optional types.
- Collaborated with other developers and end users to design and implement new features throughout the framework.
- Familiarity with newer specifications of TypeScript/ ECMAScript (ES6).

Environments: TypeScript | JavaScript ES6 | Node.js | Express.js | JSON | AJAX | UI | MS SQL Server | MySQL | React.js | Bootstrap | jQuery | CSS3 | Git | GitHub | HTML5 | RESTFUL API | AGILE | SDLC

Cyber Code Tech, Baghdad, Iraq.

Aug 2018- Jul 2021

Role: Full-Stack Developer (MERN).

Responsibilities:

-
- Involved in various phases of Software Development Life Cycle (SDLC) of the application like Requirement gathering, Design, Analysis and Code development.
 - Responsible for creating efficient design and developing User Interaction screens using HTML5, CSS3, JavaScript, jQuery AJAX and JSON.
 - Involved in developing different modules using React, HTML5, CSS3, Bootstrap, React-Bootstrap, JavaScript, Express.js & Restful API.
 - Developed various screens for the front end using React JS and used various predefined modules from NPM (Node Package Manager) and library.
 - Utilized React to build high-quality, scalable and reusable components like multi-field form elements and background file uploads. Used React, and React-Router for app routing.
 - Used HTML5, CSS3, React JS as the front-end tools to build module pages that communicate with back-end API with Restful API, Node.js, Express.js, and Mongoose.
 - Worked on React-AJAX to exchange data with server and updating parts of online-chart page without reloading the page.
 - Utilized React Router to reduce render function complexity and improve code base scalability
 - Designed the REST API in Node.js for the client to consume, used Express.js framework on Node.js for quick development.
 - Implemented UI mock-ups, integrating third party react libraries, and handling/creating store data.
 - Used React library for the logical implementation part at client side for all the modules.
 - Created Responsive Web Design using Bootstrap grid structure and CSS Media Queries, optimized CSS file using processor SASS.
 - Separate production and development resources with API key handling techniques.
 - Analyse and resolve conflicts related to merging of source code for GIT.
